This is a vibe coded program

about A* ?

Algorithm

files input → use DOCX by Dolan Miu → delete “... ” etc.

use llm api key → chack ans. → add ans. → output files

Note

this project will not be possible without

DOCX by Dolan Miu

thank you <3

anything else?

and... yes this website was made by a 14 year old in thailand inside his bedroom with a 12 year old computer

V 1.0

DOCX example.pdf DOCX

Pdf text here

DOCX along name....

Pdf text here

DOCX examlp.docx

Docx text here

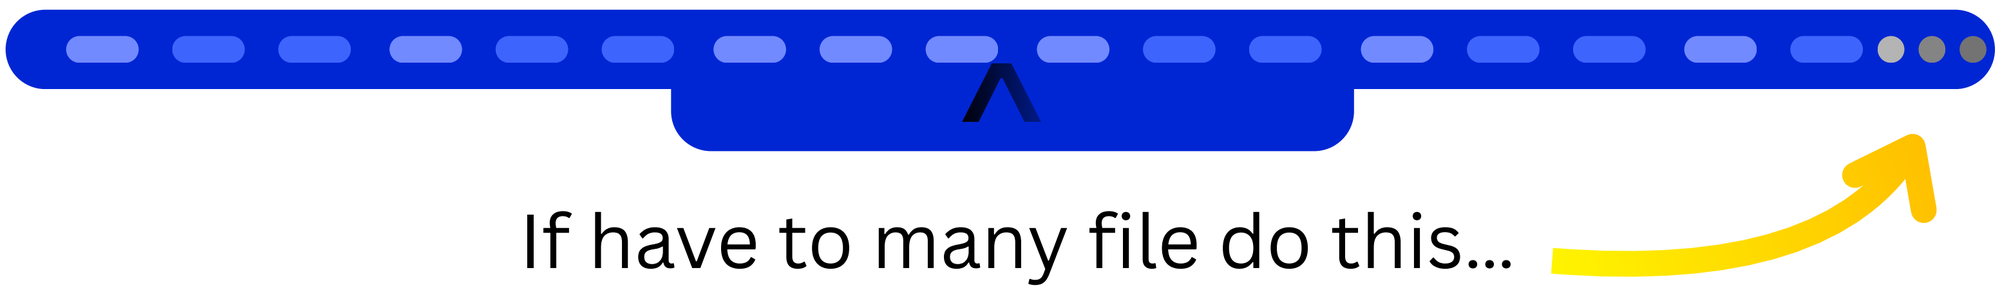

when haveing to many files the files tap will scale down like so and do the ... at the end ,the user can use the scroll wheel to see the files on the left or on the right and the selected tap will dynamically scale up

*Note this is NOT the part of the ui

This is where the file display [when scale down the “text preview”]

this a docx files [2files]

If have to many file do this...

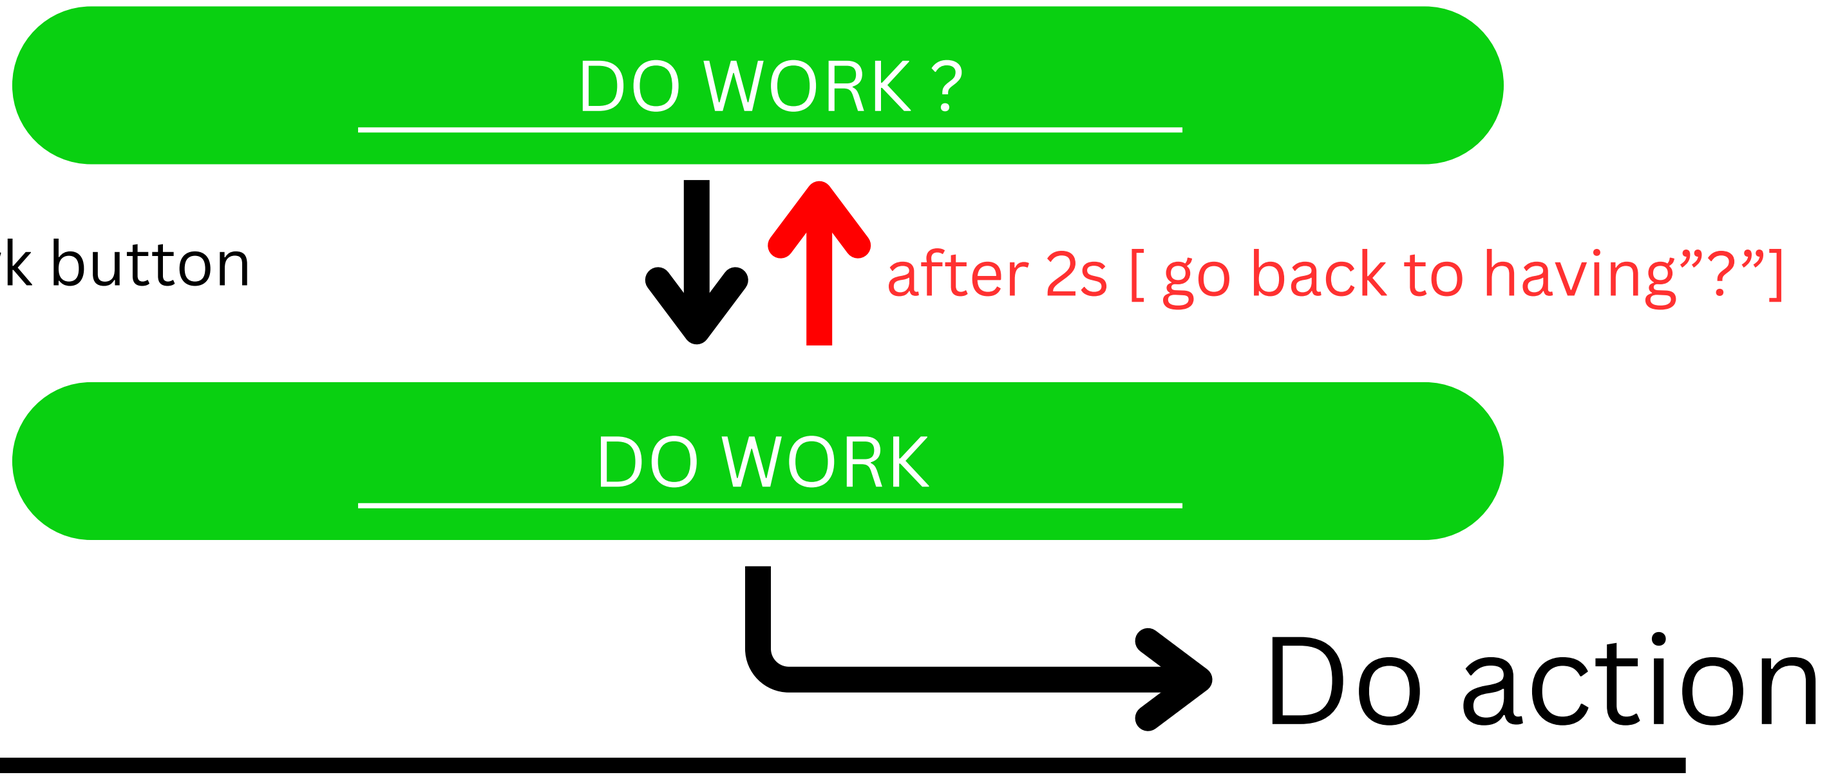

[Make it a “...”]

*Note this is NOT the part of the ui

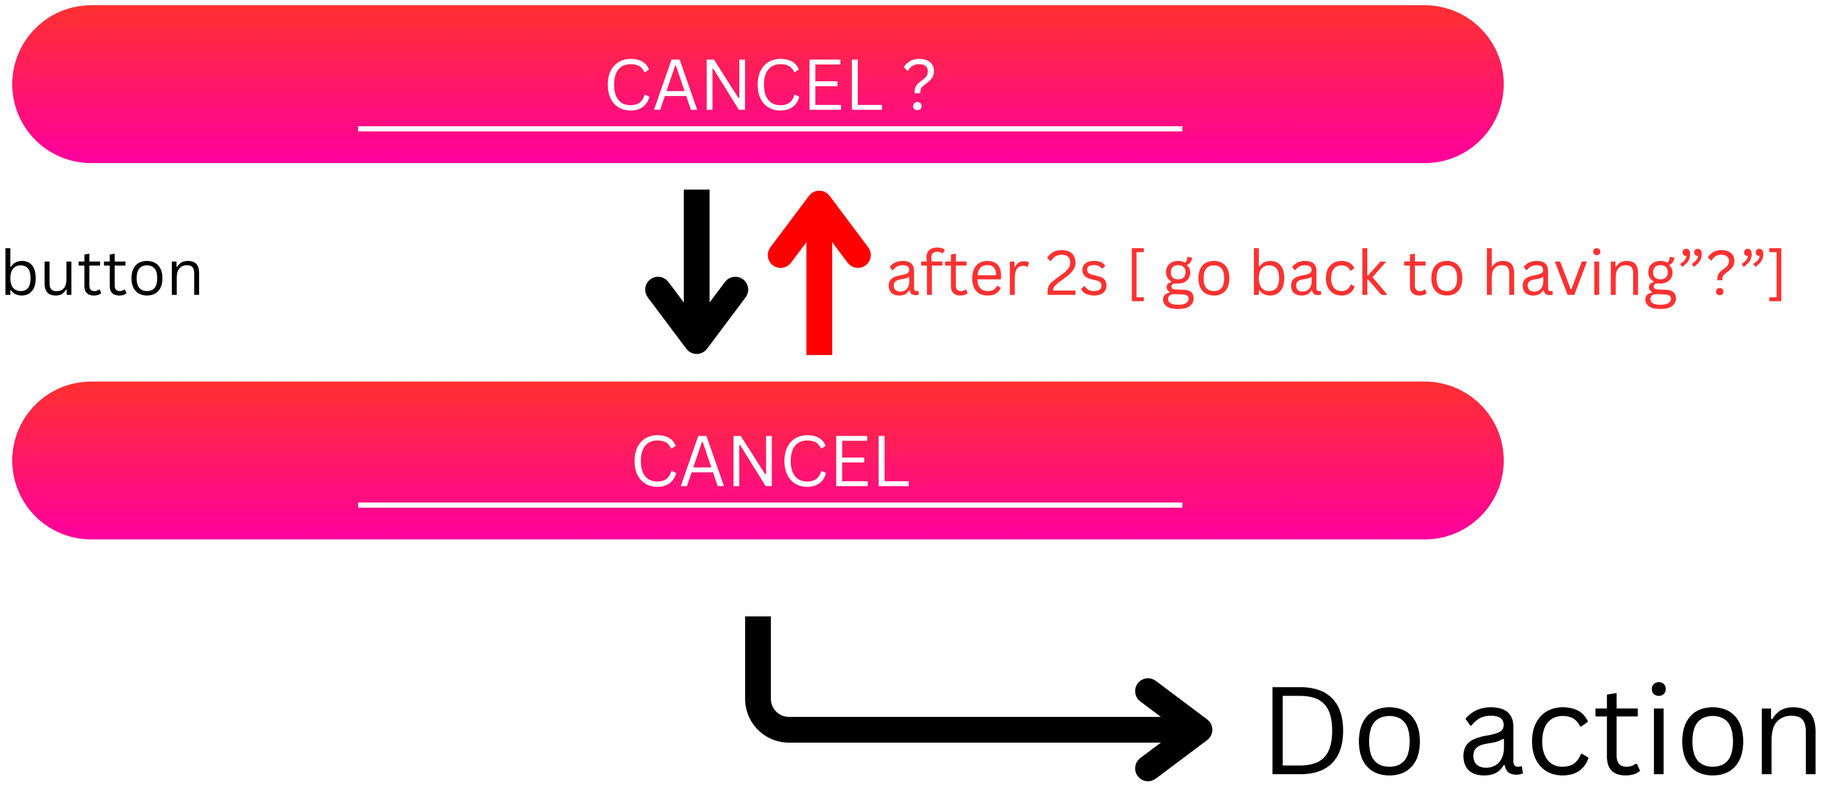

When you click, it will change from having ”?” to not having the “?”; this ALSO apply for the cancel button and will unconfirm itself after 2s, if you don’t click it again[go back from example :”do work” → “do work?”]

(For confirming it before doing the work or cancel action)

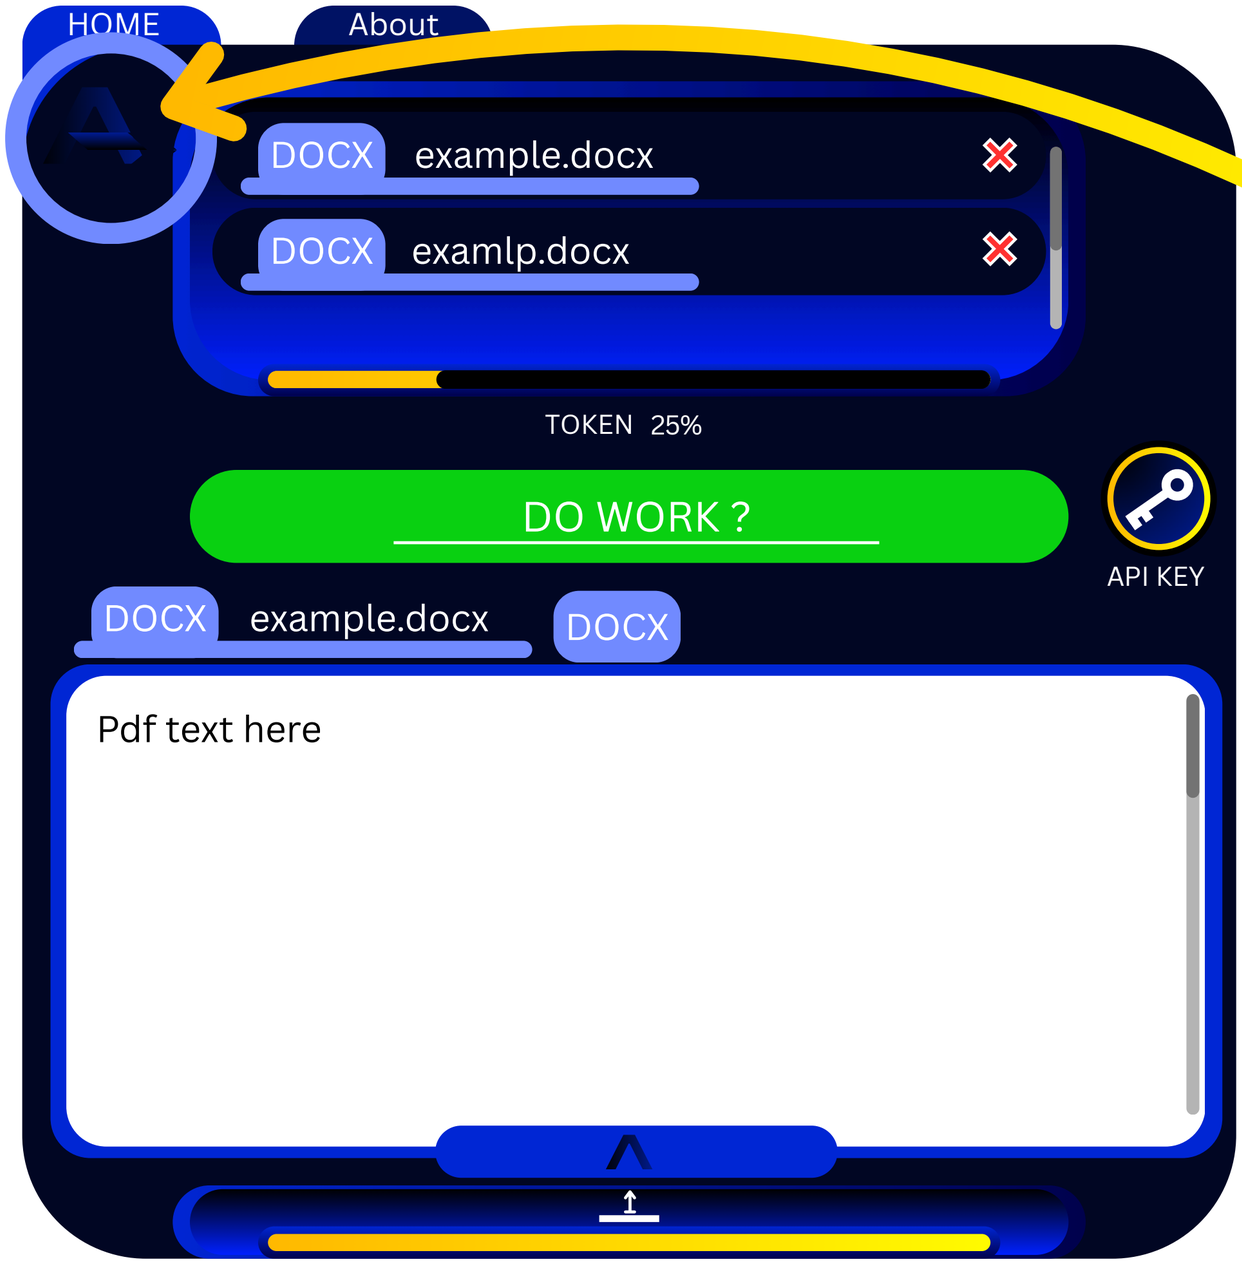

Example : do work button

Example : cancel button

*Note this is NOT the part of the ui

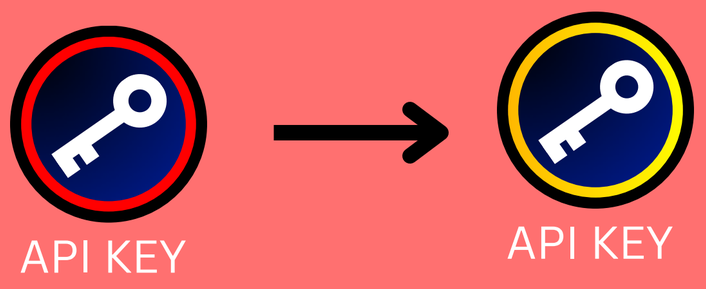

When you click on the logo it will open the “about” page but make it so it is not as easy to click so the user don’t accidentally click it to often

when the cursor is hover over the aip key icon the box will open and then even if the cursor is on top of the “your api key” box it will stay open until the cursor is a not on top of both the aip key icon an the “your aip key”box

The “don’t have one?” Will be the link to google ai studio so you can get an API key! and will highlight lightblue when the cursor hover over it

*Note this is NOT the part of the ui

when have an API key the ring will become a golden color instead of a red color like before and it will flash red when continue without an API key or have any problem,the ring will also turn red when the api key have any problem like it is not working for example .

ERROR [*show error code here*]

you don’t have any work!

ERROR [*show error code here*]

It seems like you have ran out of TOKEN!

the error massage text box is a popup - and it will disappear in 5s

ERROR [*show error code here*]

It seem like the API key is NOT working

ERROR [*show error code here*]

Files type not supported

ERROR [*show error code here*]

you don’t have an API key!

ERROR [*show error code here*]

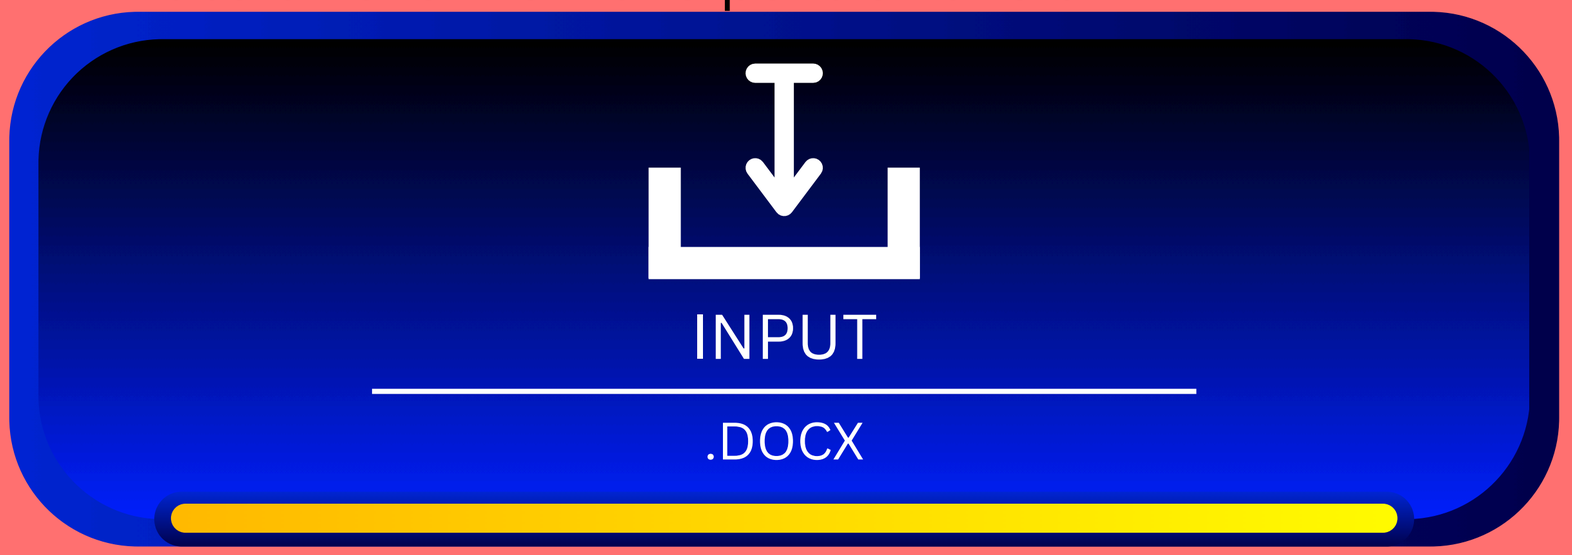

To many requests !

Work done!

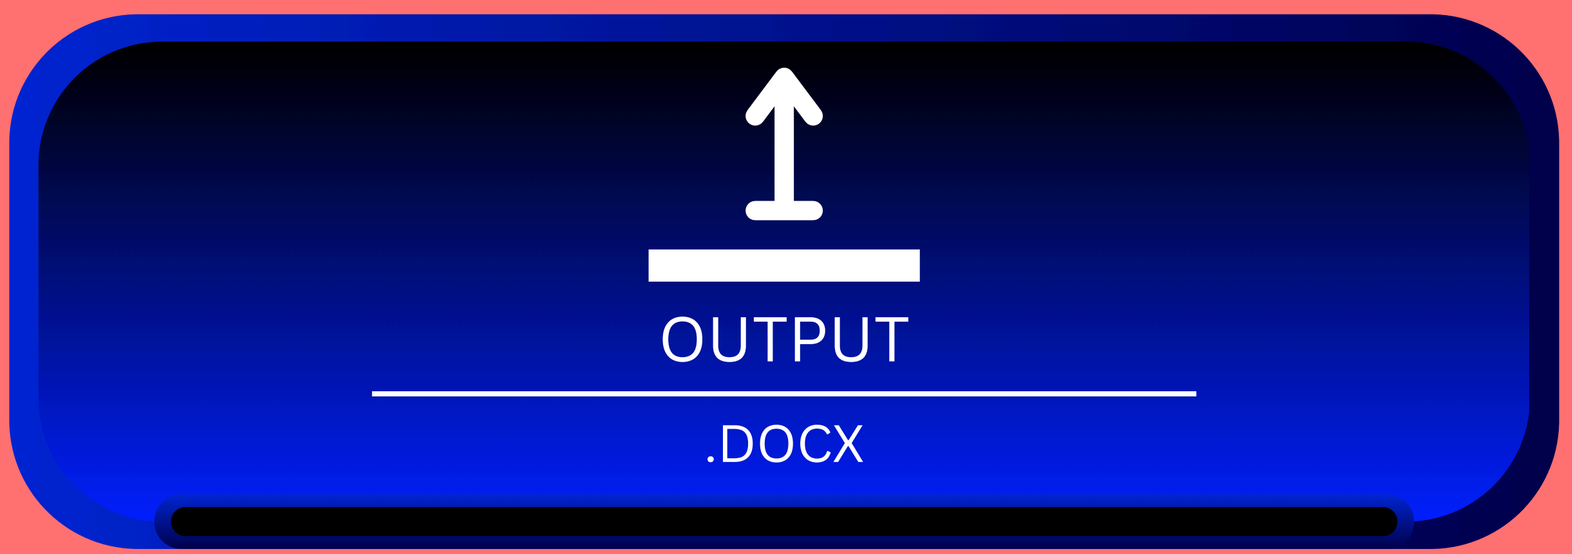

Now you can download it!

this massage text box is also a popup - and it will also disappear in 5s

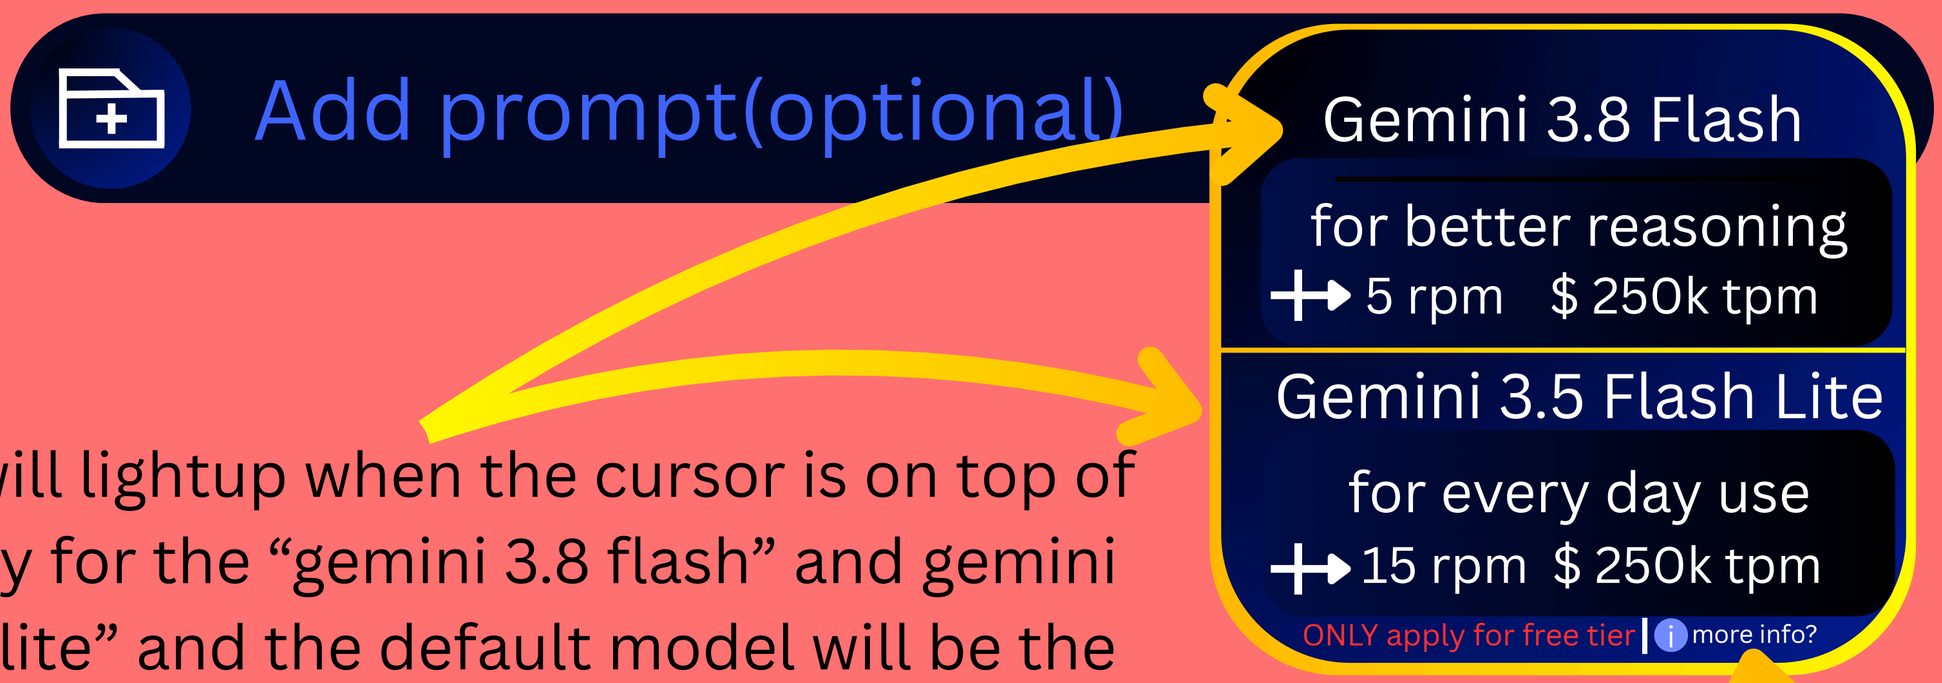

*Note this is NOT the part of the ui

the outline of the input box will lightup when the cursor is on top of the box or a file that got drag on top,samething also apply for the output box just only for the cursor NOT the file that got drag on top

and you can impart the file by clicking on the input box

the text will lightup when the cursor is on top of them only for the “gemini 3.8 flash” and gemini 3.5 flash lite” and the default model will be the “gemini 3.5 flash lite

the “more info?” text will lightup when the cursor is on top of the text and when click it will link to google ai studio

*Note this is NOT the part of the ui

1

2

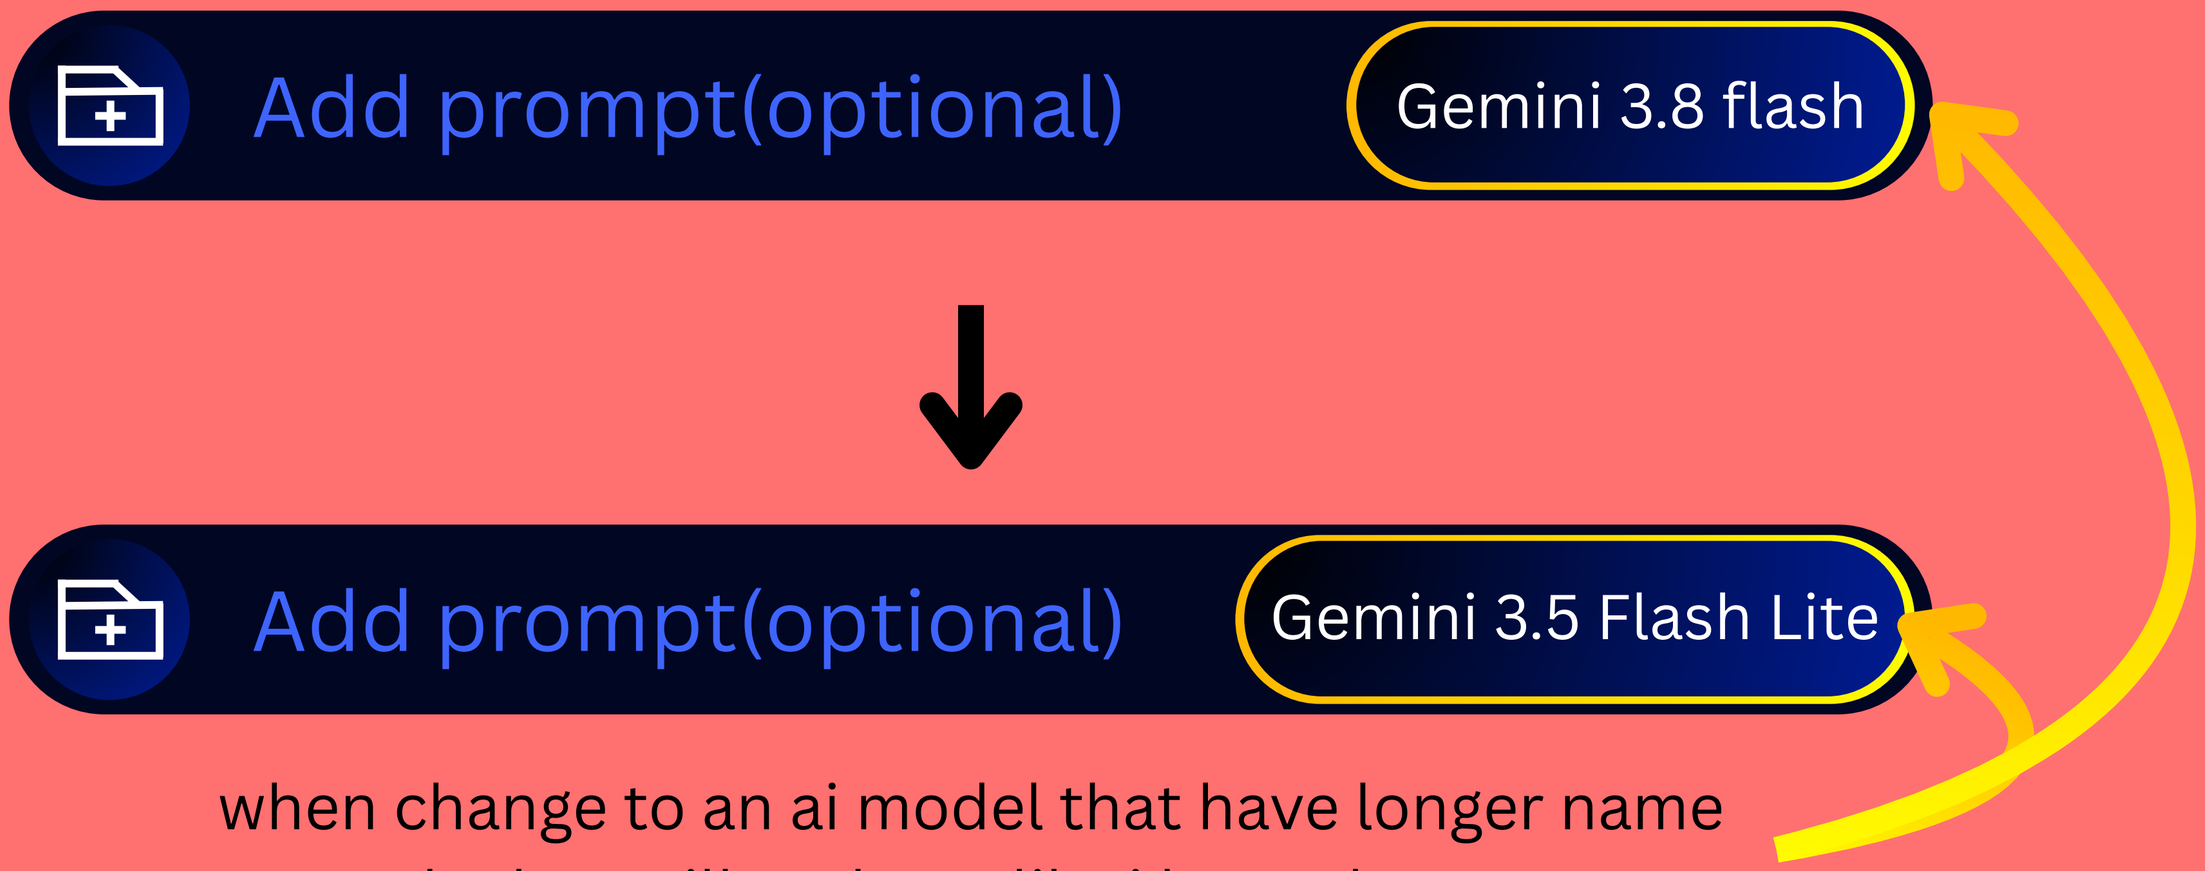

when the “add file” got click it will open the user files explorer and updata the icon to the “2” image so from the “1” image the user can import the files to add prompt as file so they can give the llm more info about the work like the source etc.

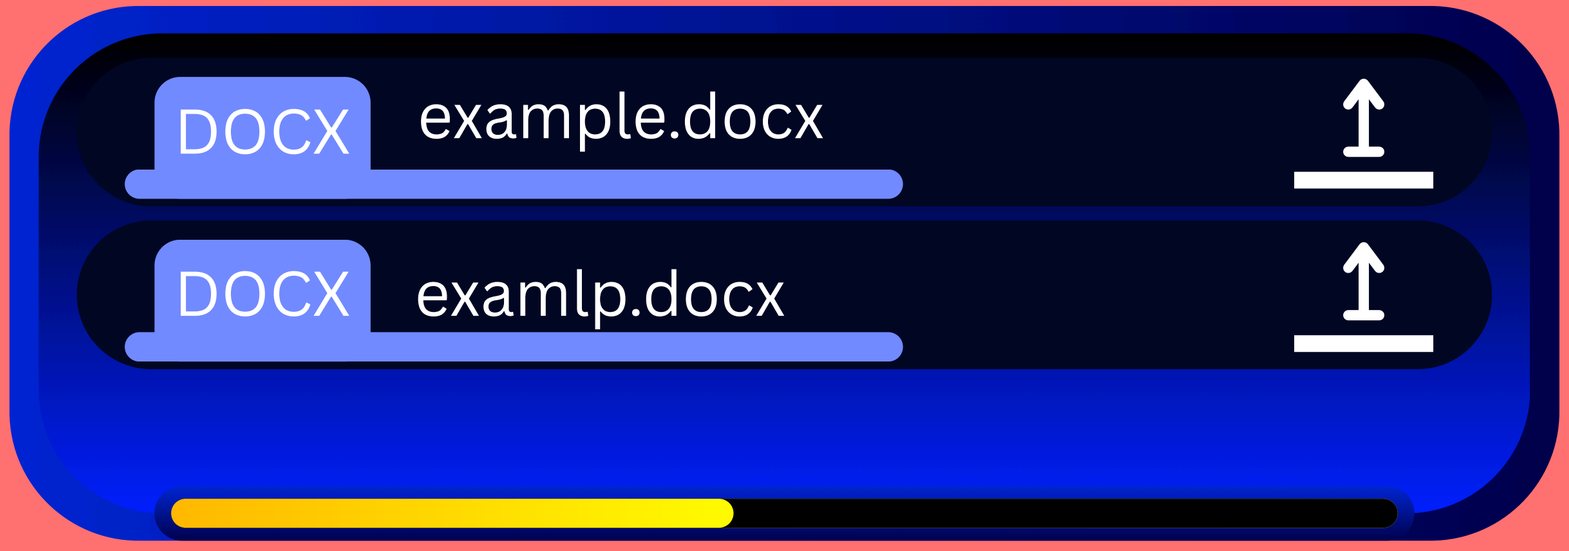

add custom prompt

*Note this is NOT the part of the ui

when change to an ai model that have longer name
the box will scale up like i have showen

when the cursor is on top of the “download button” it will lightup and when the user click on it will download the done files from the llm and make as closely to the original as possible while still haveing the ans. added in to it

*Note this is NOT the part of the ui

OUTPUT

.DOCX

londing progress bar

PROGRESS

INPUT

.DOCX

TOKEN ???%

API KEY

INPUT

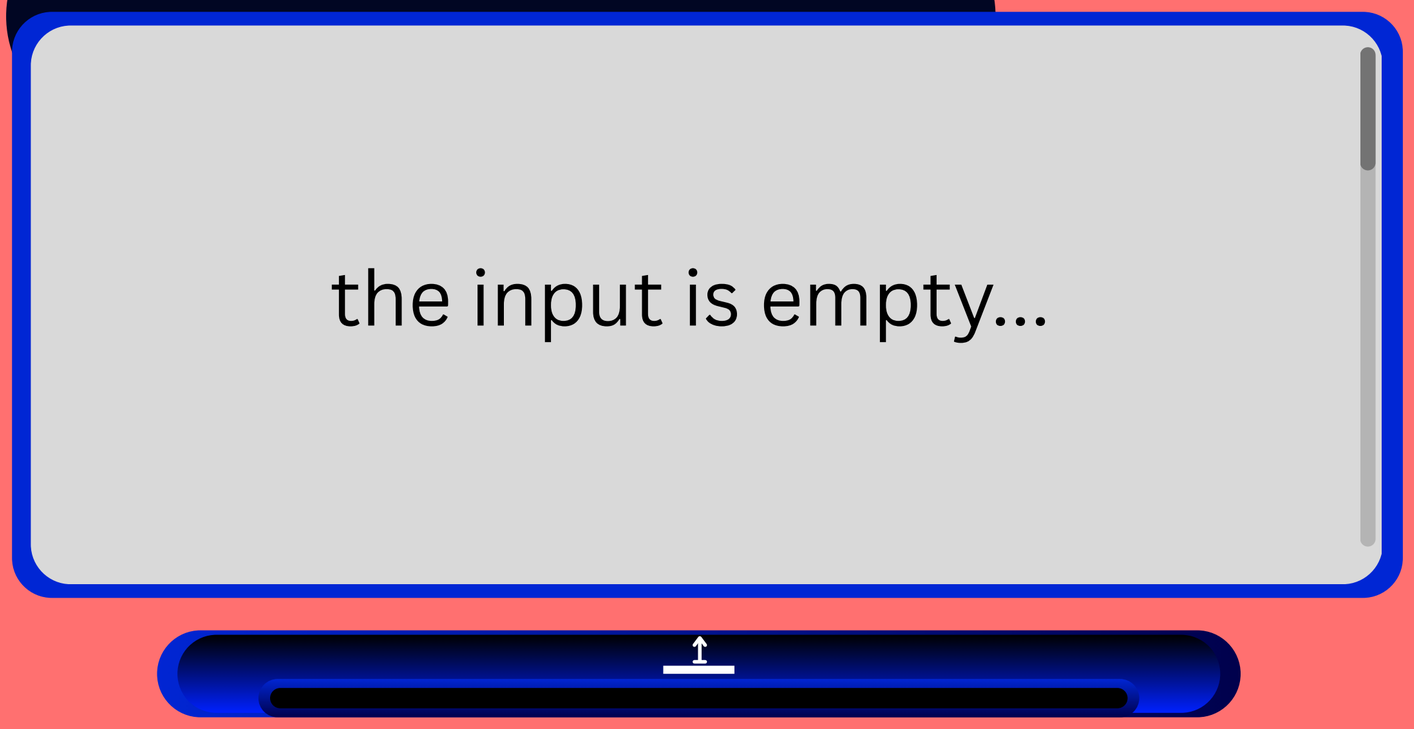

.DOCX

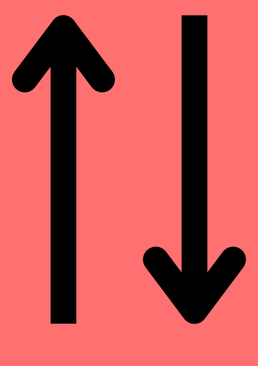

TOKEN 100%

API KEY

token viewer bar and it will turn red when don’t have the api key

*Note this is NOT the part of the ui

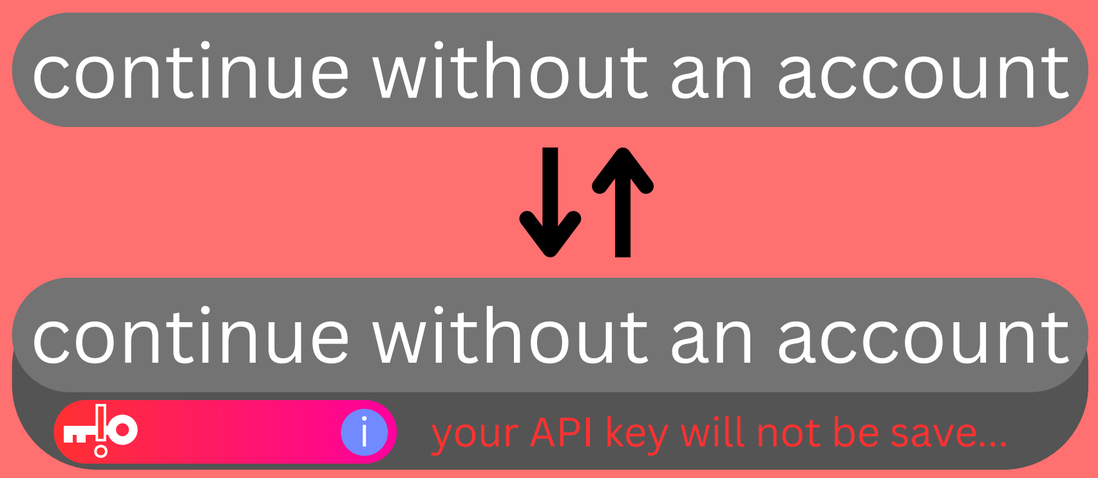

when the “text preview” is open scale the output down like the top image and will scale up like the bottom image

*Note this is NOT the part of the ui

if the cursor is on top of the “continue without an account”button the “your API key will not be save...” will slide down from the “continue without an account”button

*Note this is NOT the part of the ui

anything else?

and... yes this website was made by a 14 year old in thailand inside his bedroom with a 12 year old computer

click “anything else?” to go ot the next page and click “back” to go back both will light up when the cursor is over it

Back

if you have a dream don’t wait or waste another school break ,Do it when you can use your free time never give up one day you will be successful and keep trying - phumtas

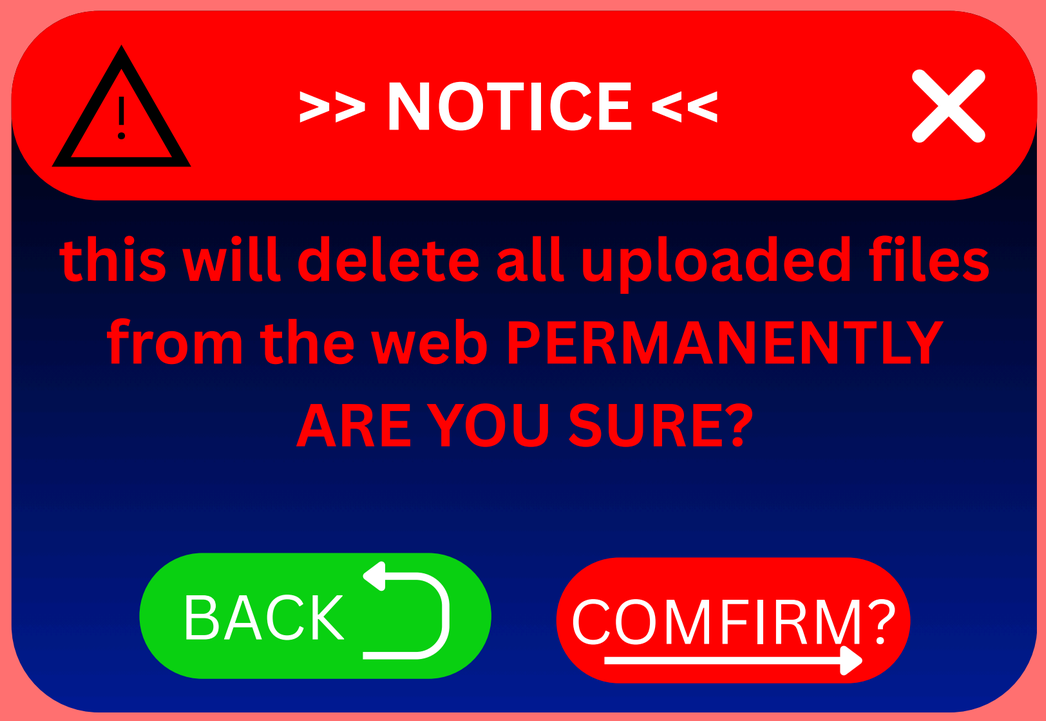

i wrote this by hand [no ai]

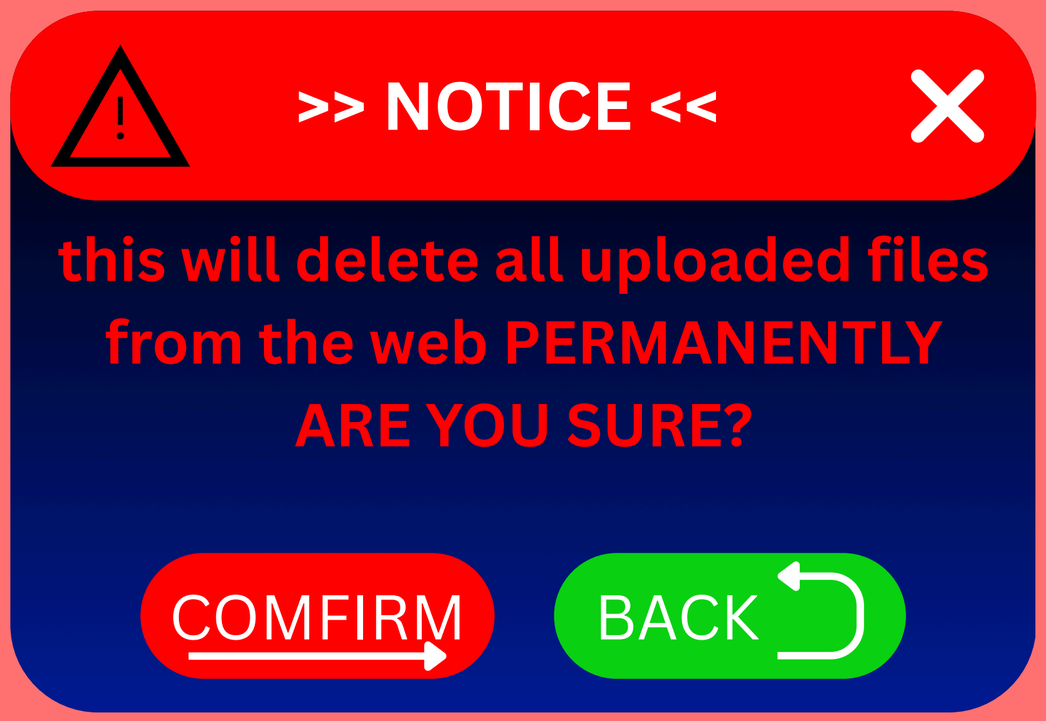

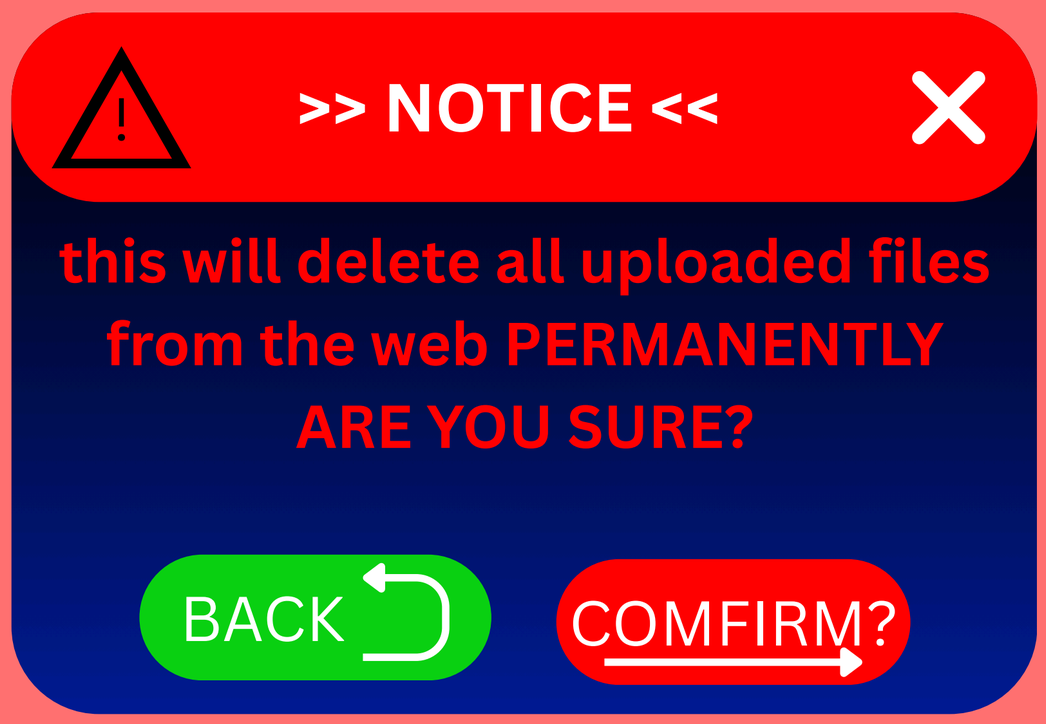

1 2

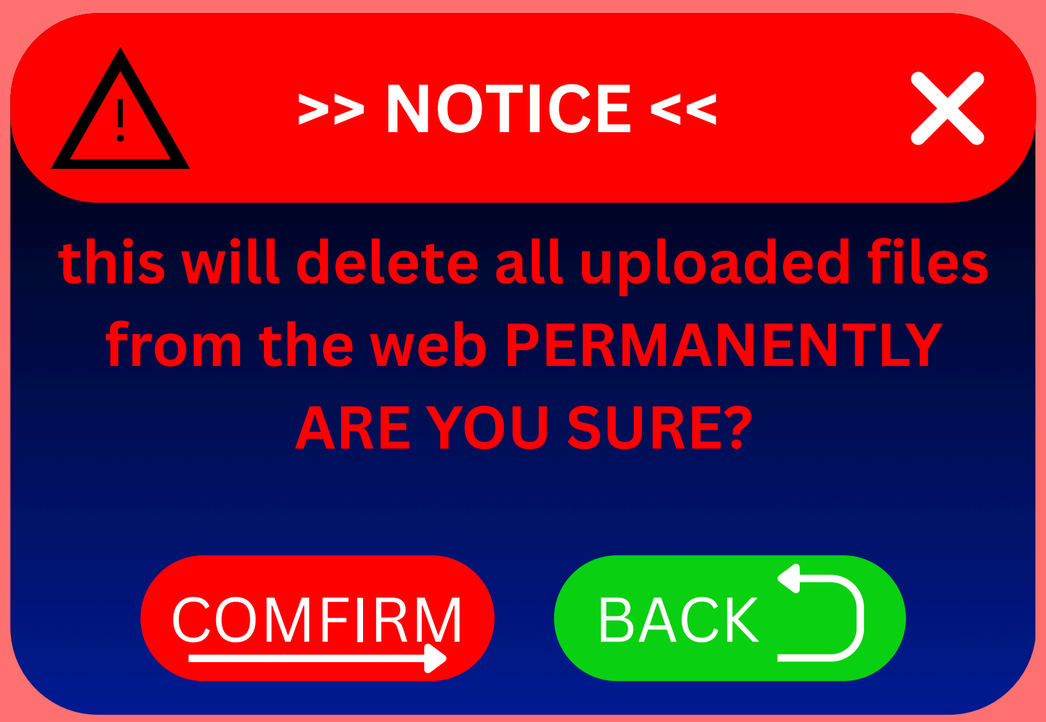

clicking at “1” will make you go to the next page and click at “2” will make you go back,both will lightup when the cursor is hover on top

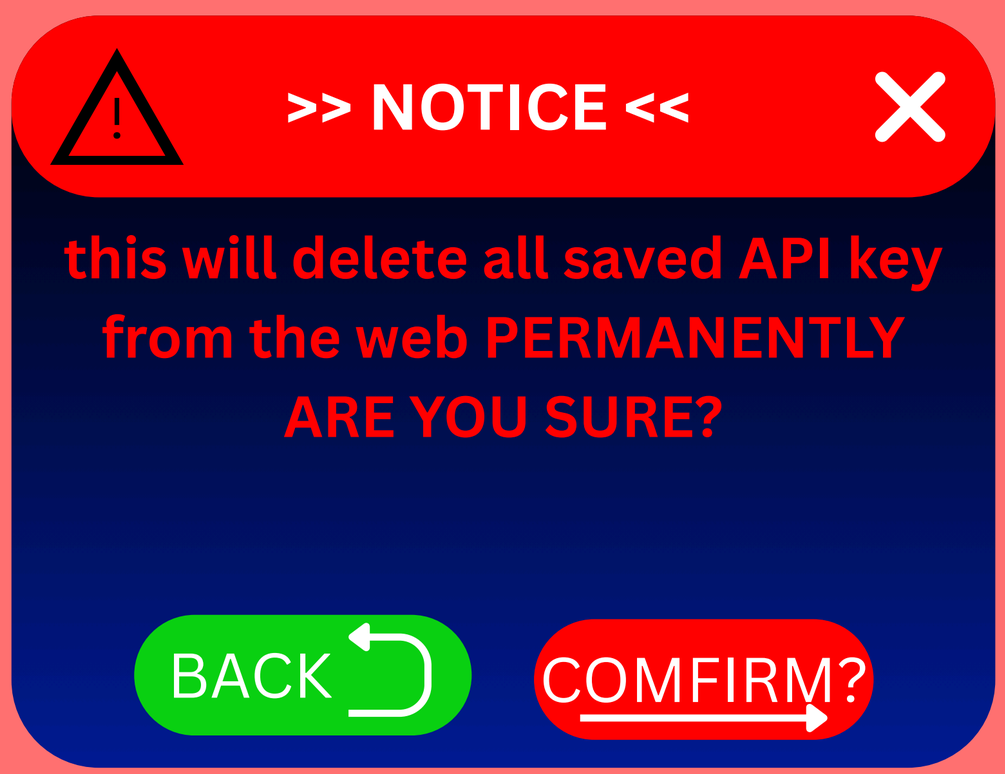

*Note this is NOT the part of the ui

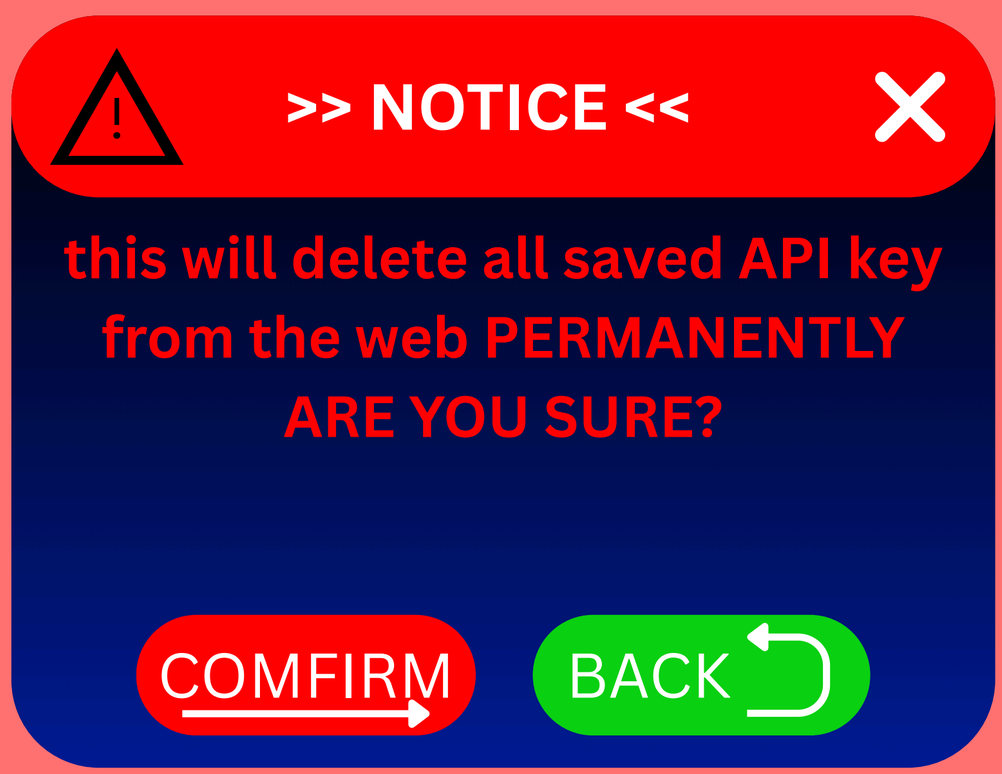

the “back” and “comfirm?” button will turn in to “comfirm” with no “?” and switch places so the user can’t spam click to comfirm

*Note this is NOT the part of the ui

defalt setting

custom setting[example]

llm text output color

#000000

#718aff

auto save API key

ON

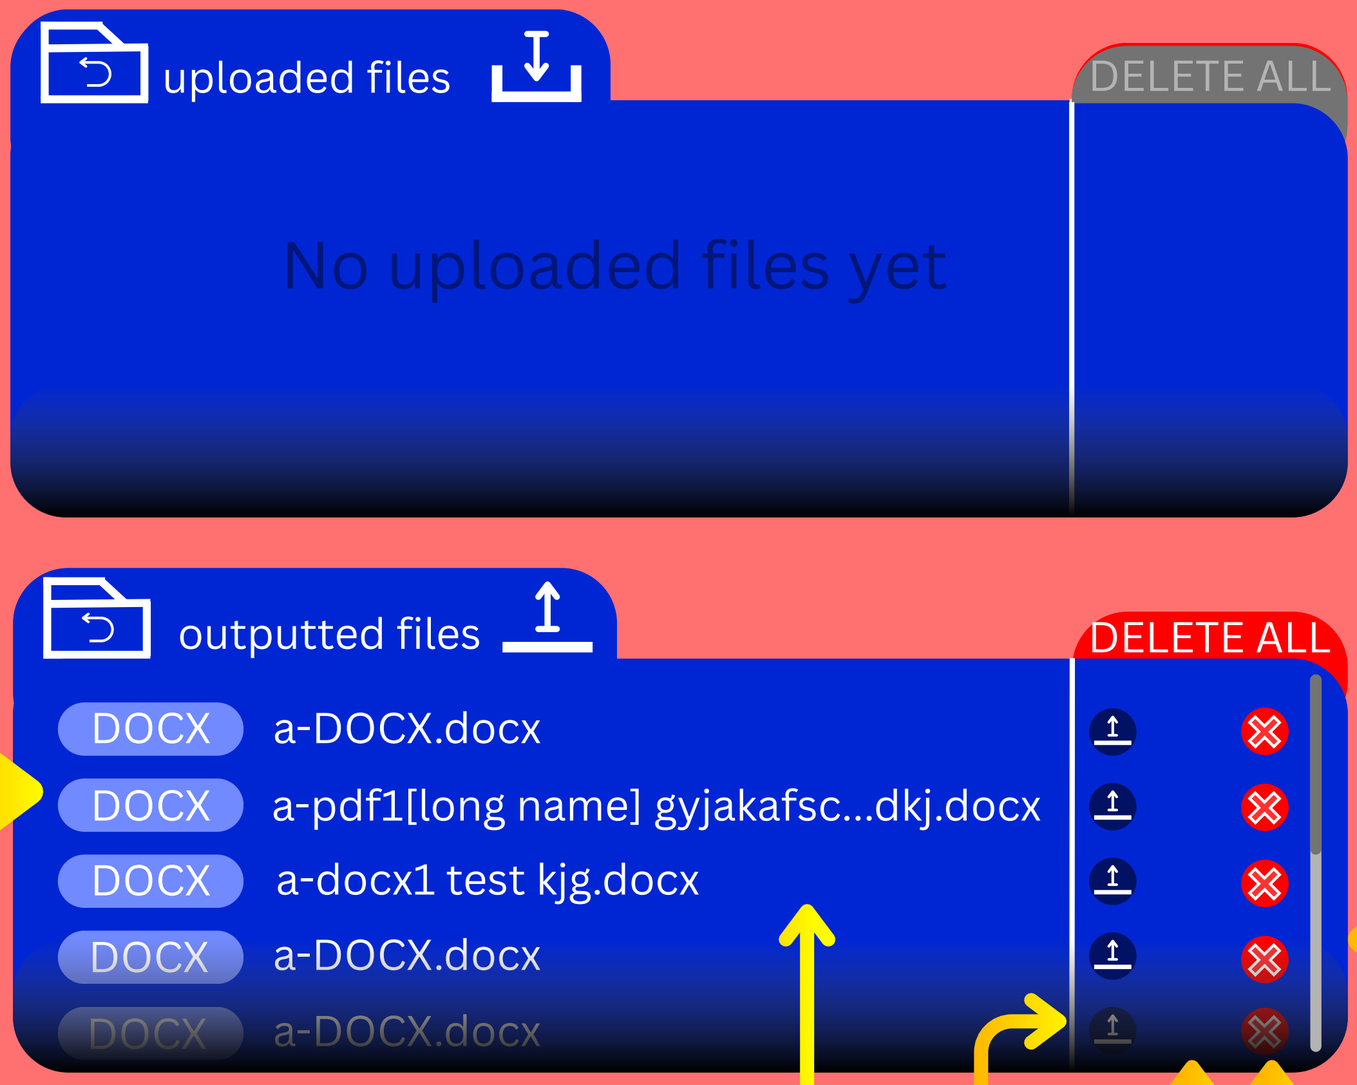

OFF

the reset setting button will change from gray to blue if it is not the defalt setting

show HEX code

color preview

*Note this is NOT the part of the ui

the “delete all” button will turn gray like so when there is/are not any item in the box and show “No uploaded files yet” but when have anyitem it will show the item like so and the “delete all”button turn red like the image as showed this also apply for the “outputted files” and “saved API key” tab

you can use this scroll wheel to look down to see more files also aply forthe “outputted files” and “saved API key” tab

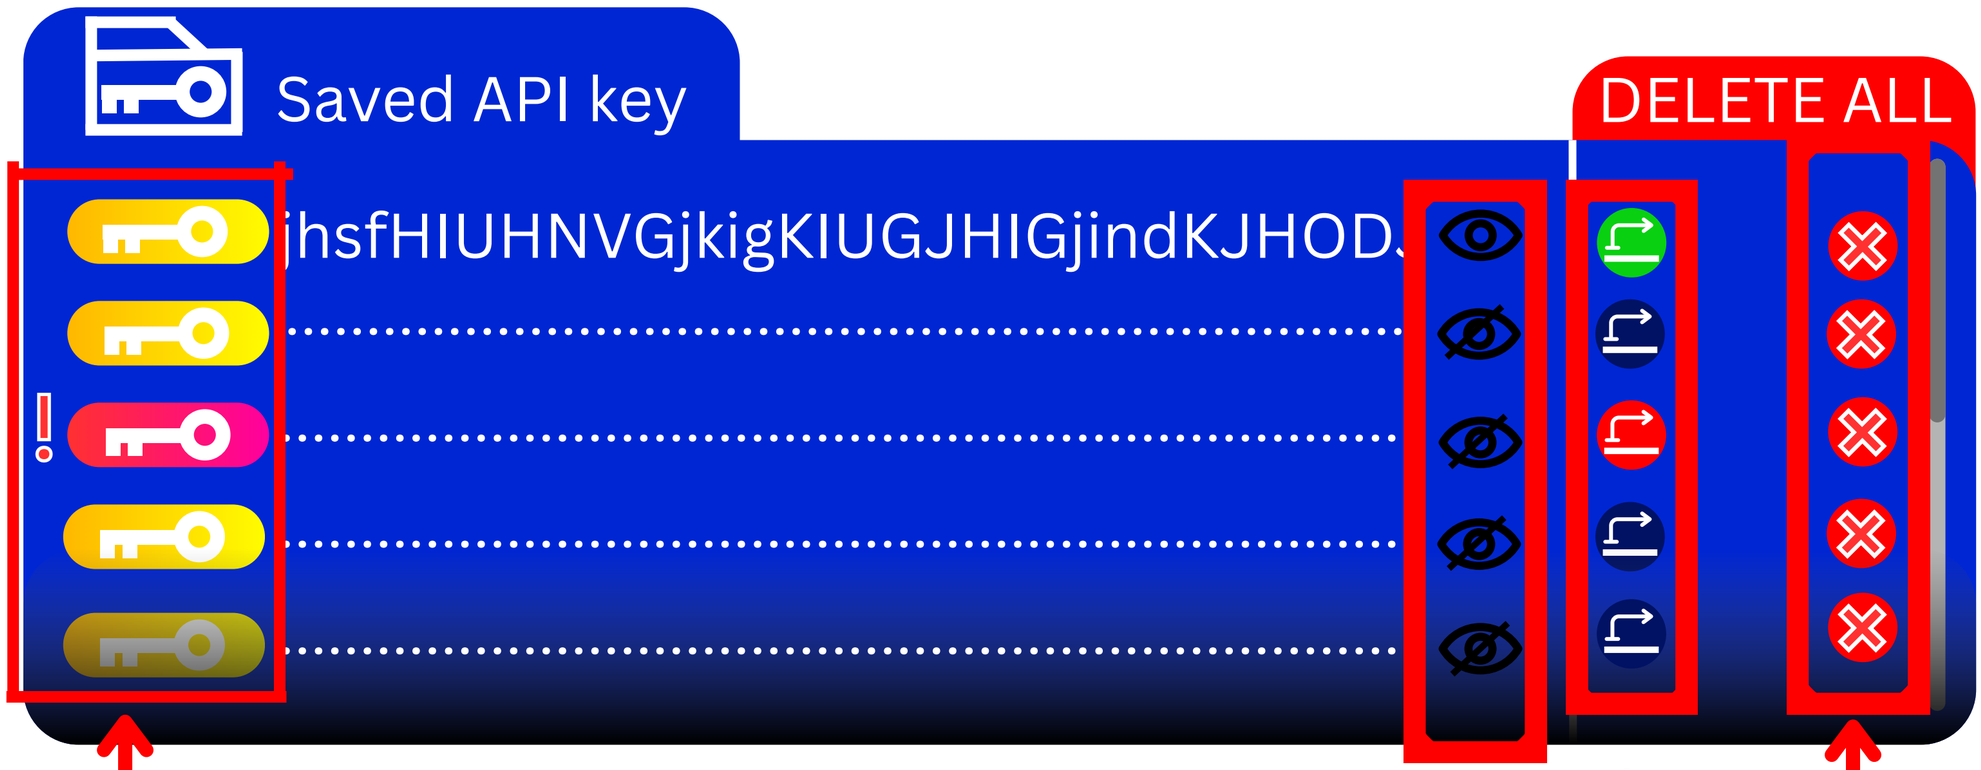

delete item

this button will download the files also apply for the “outputted files tab”

this button will put the files in to the button/tap also apply for the “saved API key” tap

color coded red for .pdf and blue for .docx

when have a long name it will use “...” then show the last 3 letter and the file type at the end

the api key icon will turn red and have a “!” icon like so if the key is not working but it will be golden if it is fine

hide/unhide api key

when you hold down “ctrl” on the key board you can click at the button you can select the default api key load out and it will turn green like the top key and will turn red when the api key is broken

delete button

*Note this is NOT the part of the ui
